

SunSmart on the go.

You spend more time in the sun than you think.

Anywhere you go, UV from the sun will damage unprotected skin and it just keeps adding up.

The more time you spend unprotected in the sun, the greater the **risk of cancer**.

Download the **FREE SunSmart app** to find the daily sun protection times for locations in Australia.

Think UV, not heat.

Check the UV regardless of the season—it doesn't have to be hot for UV to damage your skin.

Protect your skin in five ways when UV is 3 and above:

Slip on clothes that cover your arms and legs

Slop on SPF 30 or higher, broad spectrum, water resistant sunscreen and reapply every two hours

Slap on a broad brimmed hat or one that covers the head, face, neck and ears

Seek shade, particularly over the middle part of the day when UV is highest

Slide on close fitting sunglasses

See sunsmart.org.au for more.
