

What is a SunSmart hat?

Ultraviolet (UV) radiation is responsible for 95-99 per cent of skin cancers in Australia. Almost all skin cancers can be prevented by using sun protection.

SunSmart hats reduce UV exposure and help protect the face, ears and back of the neck. They can also block more than 50 per cent of UV to the eyes.

Broad-brimmed hats

Bucket hat

Legionnaire-style hat

Baseball caps

Warning: baseball caps expose the cheeks, ears and back of the neck to harmful UV radiation.
